GEN II JRM INFINITY® DURANIUM-24 REELS

- JRM INFINITY® DURANIUM-24 reel blades are through-hardened for durability and consistency of cut
- New automated blade production process to improve blade consistency from end to end
- Improved blade helix to enhance consistency and frequency of cut
- Reels are balanced with pop rivets to eliminate interference when installing reels into housing
- Strengthened welds to eliminate bending and breaking at spiders
- New stronger blade profile and relief for durability. Less material taken off blades
- Straighter blades, better helix
- Relief angle and profile designed to stay sharp and provide a uniform cut with max durability
