The Turf Equipment Technicians Association of the Carolinas (TETAC) was formed to enhance the professional image of turf equipment technicians, to raise the safety awareness of technicians and to improve the technical knowledge of TETAC members through education and communication with the turf industry.

TETAC are the mechanics that maintain the equipment that keeps your golf course in beautiful condition. It is their technical and mechanical expertise that superintendents rely upon day in and day out. Working in coordination with equipment manufacturers and suppliers, as well as educators through local community colleges, TETAC members maintain high standards of expertise, professional relationships and work ethics.
